EDUCATION

B.Sc. Computer Science & Artificial Intelligence

Cairo University2022 – 2026

GPA: 3.6

SKILLS

- Game Development: Unity, C#, VFX & Shaders, GLSL, OpenGL.
- Programming Languages: C++, Python, Java, SQL, Dart.
- Web Development: HTML, CSS, JavaScript, Django, Java spring boot

LANGUAGES

- Arabic: Native
- English: Professional Proficiency

VOLUNTEERING

Founder & Community Manager

Sep 2023 – Present

Cairo University Game Development Community

- Established and scaled Cairo University's first game dev community from 2 → 25 organizers.
- Organized workshops, game jams, and events, fostering a thriving collaborative ecosystem.

Youtube Instructor

Aug 2020 – Nov 2021

KM-Developer

PROFILE

Game Developer and Graphics Programmer with expertise in Unity, C#, C++, and shader programming. Experienced in gameplay systems, AI, multiplayer networking, and VFX optimization. Strong background in teaching, mentoring, and community leadership. Passionate about building immersive player experiences and innovative rendering solutions.

WORK EXPERIENCE

Game Developer (Part-Time)

Al-Arcade Studio

APRIL 2026 - PRESENT

- Integrated Unity with Supabase for user authentication and data management.
- Enhanced game feel and "juice" using DOTween for polished player feedback.
- Collaborated on large-scale projects, managing version control branches and resolving merge conflicts.

Game Development Instructor

European Universities in Egypt (On-Site)

JAN 2025 - FEB 2025

- Designed and delivered a 7-unit Unity/C# course, enabling 15 students to build and publish games.
- Conducted 10 interactive workshops (4h each) on game mechanics, project management, and advanced design.
- Mentored students in troubleshooting and optimization, boosting project completion rate.

Game Developer

Freelance (Remotely)

May 2021 – Jan 2025

- Developed games across multiple genres (action, puzzle, racing, simulation) using Unity/C#.
- Led a 3-member team to deliver a racing game (300 levels, 150 cars, AI opponents, LAN multiplayer, microtransactions, shaders, VFX).
- Integrated ML Agents for AI opponents.
- Built a custom map editor to enhance player engagement.
- Conducted 60+ lectures (1.5–2h each) on Unity/C# fundamentals.
- Collaborated with students to create 30+ simple games.

Back-End Development Intern — Java Spring Boot

Banque Misr (Hybrid)

Jul 2025 – Aug 2025

- Trained in SQL, MongoDB, and database principles.
- Learned and applied Spring Boot fundamentals.
- Practiced unit/integration testing, debugging, caching, and design patterns.
- Delivered weekly team projects using Docker, Git/GitHub, and external APIs.

Flutter Mobile Development Trainee

ITI (Online)

JAN 2025 - FEB 2025

- Built Android apps using Dart, Flutter, and widgets in Android Studio.
- Integrated Firebase databases and external APIs.
- Applied concepts through mini-projects and tasks.

PROJECTS

Back Yard (Zanga Game Jam)

- Built a 2D top-down shooter with tree-planting mechanics, An enemy AI*, and environmental challenges in 3 days.
